GALLERY
INTERIOR DECOR

Gallery Interior Decor was the first production house which specialized in providing CNC cutting, carving and engraving solutions.

Since its inception, we pride ourselves to provide innovative interior design components suited to client needs, using our technical knowhow and professional expertise. With our quality driven production and creative insight, we constantly strive to integrate various segments of interior design to create custom bespoke solutions to meet your requirements. Gallery Interior Décor has the biggest production capacity in the Middle East having over 30 automated CNC routers and 6 CNC laser machines.

Since our main goal is customer satisfaction, we have operations running 24/7 through which we provide a wide range of high quality products and services with precision and accuracy.
